## SUMMARY

---

Software engineer with a background in English and creative arts from Texas A&M. Certificate in Full Stack Development from SMU with skills in HTML5, CSS, and JavaScript. Creative problem-solver that is always interested in learning more to develop user-friendly designs. Strengths include creativity, executing client vision, and detail-oriented solutions.

Earned employee of the year at a previous position, grade average in the course is an A+, and developed a web application for an assignment that can save user input in local storage and populate on page load. Dedicated and detail-oriented with a history of coordinating with other departments within companies worked for in the past. Very meticulous and interested in fulfilling the design in the cleanest and clearest ways possible.

## PROJECTS

---

### Marvel Character Directory

Developed a website with a group that pulls information from API's to display based on what Marvel character the user chooses. Used mainly HTML and JavaScript with Materialize CSS elements.

<https://github.com/leviathan902/Marvel-Character-Movie-Selector>

### Weather Dashboard

Created a website that shows the current weather in whatever city the user searches and provides the forecast for the next 5 days. Mostly JavaScript with some HTML and CSS. <https://github.com/ashleyaggie/WeatherDashboard>

### Code Quiz

An application that uses JavaScript and HTML to enact a quiz over basic coding concepts. The JavaScript edits the HTML to display the questions. Coded from HTML and JavaScript with some minor CSS.

<https://github.com/ashleyaggie/CodeQuiz>
